Are there any concepts you would like to revisit?

batch normalization

logistic regression

batch normalisation whatever in the exam

whatever is in the exam

logistic v regression batch vs stochastic gd

maths behind pca

nothing

big picture overview

validation set

everything is clear the generalization error examples with real data

k-fold validation

back propagation

Any general feedback?

- Practical sessions are a bit fast-paced (9 votes)
- This module is really good so far (6 votes)
- What big projects have you two done with ML so far? (1 vote)
